

ARE YOUR PETS PROTECTED?

South Moor Vets have an offer for adult dogs and cats that have not been vaccinated, or have not kept up to date with their annual boosters. We will give both parts of a primary course for the price of a booster.

We feel that this is particularly beneficial now, as infectious diseases that can be prevented by vaccination are on the increase nation wide.

To participate you will need to download a voucher from www.vaccinationmonth.co.uk before the end of March, which can be used until the end of April. Ask us for help if you don't have internet access.

There is a rabbit offer too!

Whilst you are in take advantage of our buy 4 for the price of 3 deal on dog flea / tick pipettes (throughout 2008) and cat spot-on wormer (until the end of March)

The South Hams area is especially susceptible to dog infections, such as Parvovirus and Distemper, due to the influx of visitor's dogs in the summer.

Remember that annual vaccinations also give us the chance to thoroughly check your pet, and answer any queries you may have.
